ViaX

Practice with your own notes

An open-source AI study companion

Your notes become a study base

Upload

Add a document under a subject.

Understand

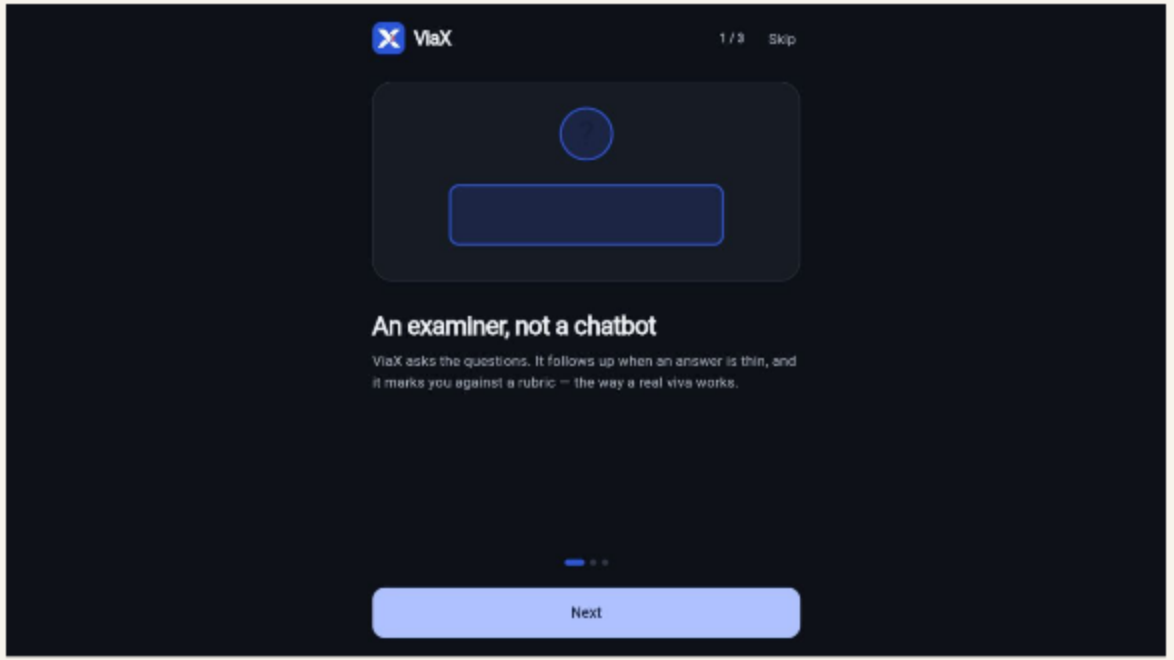

Extract passages and supported concepts.

Practice

Try viva questions, flashcards, or quizzes.

Review

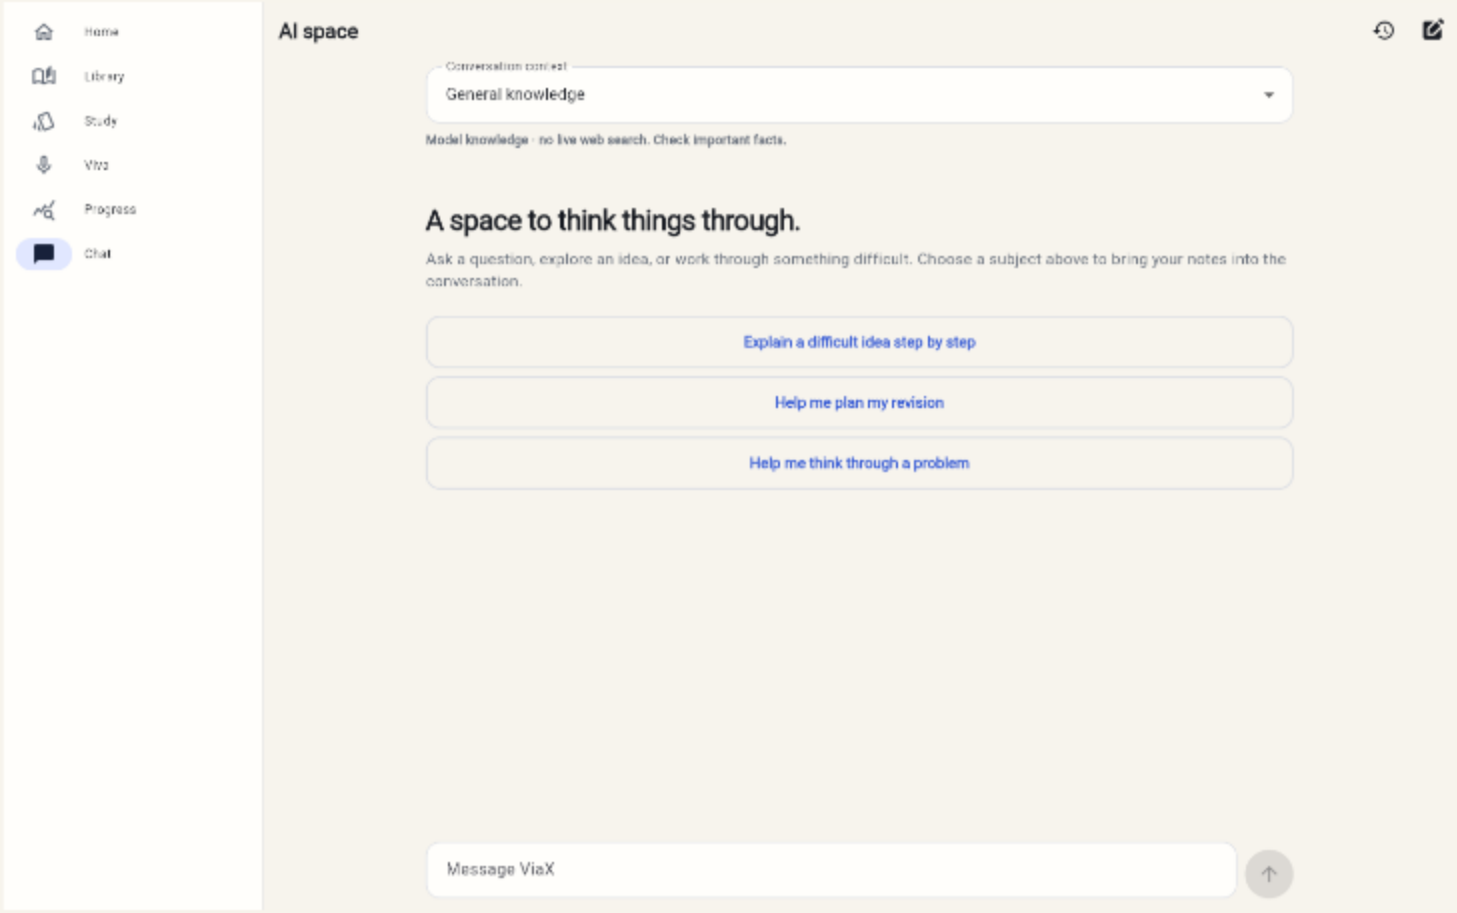

Return to gaps using revision and mastery.

Actual app onboarding, dark mode

A dedicated AI conversation space

General questions or context from a selected subject

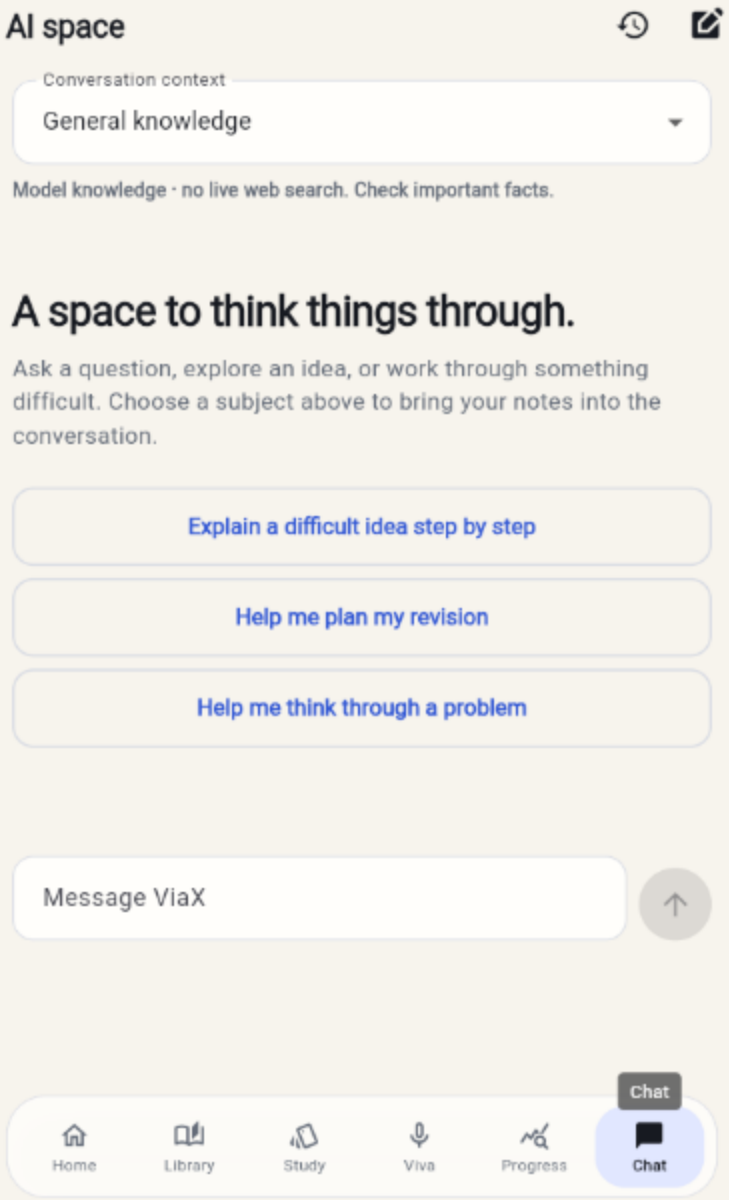

A conversation you can carry

General knowledge

Explore an idea or ask for a step-by-step explanation.

Your study notes

Choose a subject to bring saved material into the conversation.

The technology behind ViaX

Flutter	Responsive application for web and mobile.
Supabase	Authentication, private document storage, database and Edge Functions.
NVIDIA	Chat generation and 1024-dimension document and query embeddings.
Source grounding	Passages connect extracted concepts to the uploaded material.

Open source.
Ready to explore.

MIT-licensed source, database migrations,
and setup instructions are on GitHub.
